

## Andrew Klobuka, MD

### Diagnostic Radiology

Dr. Klobuka is an interventional radiologist (IR) at Allegheny Health Network, a physician who combines personalized patient consultation with advanced imaging guidance to perform minimally-invasive procedures. He utilizes advanced technology to navigate patients' arteries and veins from within to treat a wide variety of diseases including liver cancer, blood clots, arterial blockages, bleeding, uterine fibroids, and portal hypertension. He also perform biopsies and ablation of tumors in the liver, kidney, lung, and bone using specialized non-invasive equipment.

Fellowship: Allegheny Health Network - Vascular and Interventional Radiology.

Residency: University of Pittsburgh Medical Center - Diagnostic Radiology. Board: American Board of Radiology Organization: Society of Interventional Radiology

He sees patients at Allegheny General, Wexford, West Penn, Forbes and Grove City Hospitals. He offers both in-person and virtual

## Locations

### Health + Wellness Pavilion Radiology Services

### Wexford Health + Wellness Pavilion

12311 Perry Hwy  
Wexford, PA 15090  
Tel: 844.497.4284  
Fax: 878.332.4474

## Credentials | Training & Certifications

### Residency

UPMC Medical Education

### School

Drexel University College of Medicine

### Board

American Board of Radiology -  
Diagnostic Radiology

## Expertise

Interventional Oncology  
Complex Filter Retrieval  
Peripheral Arterial Disease  
Deep Vein Thrombosis  
Hepatocellular Carcinoma  
Liver Cancer  
Venous Insufficiency  
Varicose Veins

Transjugular Intrahepatic  
Portosystemic Shunt Creation  
(TIPS)  
Portal Hypertension  
Yttrium-90 Radioembolization  
Trans-arterial Chemoembolization  
(TACE)  
Kidney Cancer  
Cancer-Related Pain  
Lower Extremity Edema  
Uterine Fibroid Embolization (UFE)

visits. He also has interest in treating venous disease (including deep vein thrombosis and venous insufficiency), spinal fractures using kyphoplasty, lower extremity arterial disease, and liver cancer including hepatocellular carcinoma and liver metastases using Yttrium-90 radio-embolization. Dr. Klobuka is an advocate for patient access to the minimally invasive techniques and advanced technology that interventional radiology offers which allow for improved outcomes including faster recovery times, less risk, less pain, and better quality of life for numerous conditions.
