

Rima Ahmad, MD

Surgery

Dr. Ahmad believes that medical care, especially surgery, should be tailored to each patient's unique situation.

To meet this goal, she uses her experience in endoscopic, robotic, and laparoscopic procedures, in addition to traditional open surgery, so she can offer each patient the right approach for their needs.

Her expertise includes anti-reflux surgery and paraesophageal hernia repair, as well as surgery for gallbladder disease, diverticulitis, and tumors of the stomach, small and large bowels, and adrenal glands.

To provide comprehensive surgical care for her patients, she also performs a range of general surgical procedures including enteral feeding access, port placement, abdominal wall hernia repair, and screening endoscopy.

Dr. Ahmad received a medical degree from Shifa College of Medicine in Islamabad, Pakistan. She completed a Fellowship in Advanced GI Surgery at St. Vincent
