

Matthew J Page, PhD

Neuropsychology

Dr. Page treats patients with cognitive disorders related to a wide range of conditions (dementia, epilepsy, multiple sclerosis, Parkinson's disease, HIV, stroke, brain injury/concussion, cancer, and other medical complexities), ADHD, learning disorders (such as dyslexia), and other neuropsychiatric concerns. He is skilled at neuropsychological testing and evaluation and presurgical evaluations for deep brain stimulation, spinal cord stimulator, and epilepsy.

His special clinical interests are cognitive effects in neurological conditions such as multiple sclerosis, Parkinson's disease, and seizures, as well as ADHD and learning disorders in children and LGBTQ+ identity. He speaks English.
