

**Herman Bagga, MD**

Urology

Dr. Bagga is a fellowship-trained urologist offering comprehensive medical and surgical care for conditions and diseases of the urinary tract system and male reproductive organs. He has particular clinical interest in genitourinary reconstruction and urethral stricture disease, as well as men's health issues including sexual dysfunction and Peyronie's disease. He also specializes in renal stones, benign prostatic hyperplasia, voiding dysfunction and urinary incontinence, and urinary oncology including renal, prostate, penile, and bladder cancers. He has experience in open, laparoscopic, robotic and micro surgery. He joins the physicians of Triangle Urological Group.

Dr. Bagga received his medical degree from Johns Hopkins University School of Medicine in Baltimore, Md., prior to completing residency in urology at the University of California, San Francisco (UCSF). He then continued training with a fellowship in genitourinary reconstruction and prosthetics at the Cleveland Clinic
